

## CMPS 115 - Software Methodology

### **Heading**

Document name: Sprint 1 report

Product name: Slug Assistant

Team names: Michael Garcia, Clayton Keleher, Rensselaer Smith, Bryan Nguyen

Date: 10/21/16

### **Actions to stop doing**

As a team, there are no activities or actions that we feel like we should stop doing. We are currently satisfied with our current process, except for minor issues such as being late or absent to scheduled group meetings.

### **Actions to start doing**

As a team, we feel that we should schedule more group work sessions, since these are very effective at getting work done. Also, we should be more accurate at estimating work tasks, since there were a few tasks under-estimated for this sprint.

### **Actions to keep doing**

As a team, we feel like we should continue holding our SCRUM meetings at the same times and days. Also, we feel like we should continue to meet up for group work sessions, possibly more than once a week.

### **Work completed/not completed**

Completed:

User Story 1

Uncompleted:

User Story 2

### **Work completion rate**

Total number of user stories completed; 1

Total number of estimated ideal work hours: 10-15 hours

Total number of days during sprint: 14 days
